How Do I Find My Article?

Locating articles is easy if you use the link embedded in the library’s databases. Just click on the SFX button that appears on the search results screen.

It lets you check in one place to find:
- full-text access
- the print copy in the Periodicals collection
- an interlibrary loan link (if not available through Founder’s holdings)

If you are not in a database, you can check the article’s availability at the Citation Linker at the Does the Library Have This Journal? link on the Library’s web site.
